

VIJUG

Vancouver Island Java User Group

<http://www.mosabuam.com/vijug>
would like to invite you to our
August 2009 meeting

An Application Framework for Swing

Kelly Robinson, a software developer at Genomics Life Sciences Software, will introduce the Groovy based Griffon framework for easing the creation, testing and delivery of Swing applications. Griffon is largely inspired by the popular Grails web application framework, and while still very new it provides an intriguing alternative to traditional Swing UI development, encouraging good practices for an MVC style application.

Vancouver Island Technology Park,
Conference Room- 4464 Markham Street, Victoria
Thursday, 27th August 2009, 18:00-20:00
More details including raffle prizes at
